Full-Stack Software Developer with experience in Java, Typescript, modern Web Frameworks, and Cloud Platforms. I built end-to-end applications—from Frontend UI to Backend services and Scalable Deployments on AWS

## Employment History

---

### Software Developer, ThinkRoman Ventures

Duration: [Feb 2024] — Present

Technologies Used: [TypeScript, Next.js, MongoDB, Prisma, Redis, Java, Spring Boot, MySQL, Kafka, Aerospike, AWS (Lambda, EC2, S3), JUnit]

- As Full-Time Developer (June 2024 – Present):
  - Built and deployed scalable full-stack applications using Next.js, MongoDB, and Prisma ORM for both B2B and B2C use cases. Optimized system performance and user experience.
  - Designed modular SaaS architectures with multi-tenant and production-grade performance.
  - Integrated third-party APIs like WhatsApp, Zoom, and payment gateways (Razorpay, PayU, PayPal) for end-to-end feature delivery.
  - Optimized performance across mobile and desktop platforms with server-side rendering, dynamic routing, and efficient data fetching.
- As Intern (Feb 2024 – June 2024):
  - Contributed to development of internal tools and modules under mentorship.
  - Gained hands-on experience with API integrations in production-ready applications.
  - Participated in code reviews, daily stand-ups, and agile development processes.

## Projects

---

### OutPost – AI Social Scheduler & Content Generator | <https://outpost.sudeepkudari.online>

- Built a full-stack SaaS platform that enables users to connect multiple social media accounts, auto-generate content using AI (supports OpenAI, Claude, etc.), schedule posts across platforms, and manage multiple brand accounts from a unified dashboard.

### Forms Factory – Collaborative Form Builder & Submission | <https://forms.sudeepkudari.online>

- Built a collaborative form platform with dynamic form creation, team invites, real-time submissions, API Keys, Webhooks, Excel export, and role based access for secure workflow.

## Skills

---

Java, TypeScript, JavaScript, React, Next.js, Spring Boot, Node.js, MongoDB, MySQL, PostgreSQL, Redis, Kafka, AWS (S3, EC2, Lambda), Git, Linux, Prisma ORM, JUnit

## Education

---

Bachelor of Technology in Information Science, New Horizon College of Engineering, Bangalore

(June 2019 — August 2023) | CGPA - 7.6
